

Faizan Naveed

Uxbridge, London, UK

+44 7933398273 | 2513476@brunel.ac.uk

LinkedIn [linkedin.com/in/faizan-naveed-3150aa388/] | GitHub [github.com/faizanspec308]

KEY SKILLS

Technical Skills

- **Data & Analytics:** Python (Pandas, NumPy), Power BI, Excel, SQL, Tableau (learning), KPI reporting
- **AI & ML:** Logistic Regression, Random Forest, XGBoost, Scikit-learn, Agentic AI, PyTorch
- **Programming Languages:** Python, Java, JavaScript, SQL, React, Python FastAPI, Typescript
- **Databases & Tools:** MySQL, MongoDB, Git/GitHub, Jira, Docker, AWS (learning), SPSS, Microsoft 365
- **Cybersecurity & Networking:** Wireshark, Active Directory, Virtual Machines, TCP/IP, DNS, UDP, Windows 11
- **Development Methods:** Agile/Scrum, OOP, CI/CD fundamentals, full lifecycle software development, stakeholder reporting, continuous improvement, data-driven decision making

Soft Skills

- Translates complex data findings into clear insights for both technical and non-technical audiences.
- Proven team leader — led 4-person teams as Product Owner in Agile workflows.
- Confident communicator in fast-paced environments, including hackathon pitches and presentations.
- Detail-oriented approach to troubleshooting, documentation, and process reliability.

EDUCATION

Brunel University of London, Uxbridge

Jan 2025 – June 2027

BSc Computer Science (Predicted 1:1)

- **Year 2 Modules (2025/26):** Fundamentals of Algorithms, Software Development, Networks & Computing (TCP/IP, DNS, network protocols, Linux systems, multi-threaded communication), Level 5 Group Project.
- **Year 1 Modules (1:1 overall):** Logic & Computation (A+), Programming Applications (A), Group Project: Software Design & Implementation (A), Information Systems & Organization (A-).

Superior College, Pakistan

Oct 2022 – June 2024

- **FSc Pre-Engineering (A-Level Equivalent):** Chemistry(A), Mathematics(A*) Physics(A).

Elanco Company Award: Best Project | CS2701 Group Project Exhibition, Brunel University London

TECHNICAL EXPERIENCE

Software Developer | Pakizm International | Sialkot, Pakistan

Feb 2024 – June 2024

Pakizm – Portfolio Website

- Designed UI in **Figma** and developed responsive portfolio website using HTML5, CSS3, and JavaScript.
- Analysed user behaviour and site performance to inform design decisions, contributing to a 35% increase in client enquiries.
- Collaborated with stakeholders to iterate on designs, demonstrating strong communication and problem-solving skills.

PROFESSIONAL DEVELOPMENT

Hillingone | Hillingdon x Brunel Hackathon — London, UK

April 2026

- Built an agentic AI booking platform (React, FastAPI, PostgreSQL, Google Gemini) unifying 17 fragmented Hillingdon Council systems with four autonomous AI agents for intelligent search, booking, demand sensing, and inventory optimisation.
- Pitched to senior council officers, Microsoft, and ICS.AI representatives.

TECHNICAL PROJECTS

Fraud Detection System | Machine Learning & Data Science Project

Jan 2026 – Feb 2026

- Built an end-to-end data analytics and ML pipeline in **Python** using **Pandas** and **Scikit-learn** to analyse 6M+ financial transactions, performing data cleaning, exploratory analysis, and **KPI** reporting to surface actionable fraud patterns across transaction types, amounts, and account behaviour.
- Trained and evaluated a Logistic Regression model with **StandardScaler** and **OneHotEncoder** preprocessing, applying **class_weight='balanced'** to address severe class imbalance (**~0.1% fraud rate**).
- Deployed a real-time AI application using **Streamlit** enabling users to input transaction data and receive instant fraud classification, demonstrating end-to-end analytics solution delivery from raw data to user-facing output.

Full-Stack Web App Development | Mental Health Support Platform (UN SDG 3)

Oct 2025 – Present

- Collaborating as Product Owner, defining project vision and aligning deliverables with user needs across an Agile workflow.
- Coordinating front-end development (**React, HTML, CSS, JavaScript**) and back-end integration (**Java, Spring Boot, SQL**).
- Overseeing ongoing feature testing, integration, and documentation to maintain consistent quality.
- Translating stakeholder input into user stories and leading sprint planning, backlog prioritisation, and version control (**Git/GitHub**).

University Management System | First-Year Group Project

Feb 2025 – Aug 2025

- Led a 4-person team to design and build a University Management System with a Java GUI, managing data queries and filtering logic in MySQL to generate reports on attendance, course uptake, and student records.
- Designed interface and user flows in Figma prior to implementation, ensuring clear navigation and data accuracy through validation checks and testing.
- Conducted thorough testing and validation to ensure data accuracy and system reliability, receiving first class grade with positive assessor feedback on usability.

Tick Sighting Tracker | Personal Web Development Project

Oct 2025 – Nov 2025

- Developed a full-stack web app using **React 18, Vite**, and **JavaScript** with interactive UK mapping (**Leaflet.js**) to visualise and filter **500+ tick sightings** by species, location, and date.
- Designed and developed validated report form with real-time input validation, conditional warning system for unknown species, and local Storage API for client-side data persistence.
- Built real-time filtering dashboard with **Recharts** (pie/bar charts), validated report form with conditional warning logic, and deployed fully responsive UI using **React Router** and **React Hooks**.

Part-time Employment

Marketing Manager | Robothink STEM Education, London

May 2025 – Oct 2025

Managed Facebook Ads and Google Ads campaigns analysing KPI data to optimise performance; maintained CRM systems tracking client pipeline and reported commercial insights to management.

INTERESTS

- **Technology Innovation:** Passionate about how software engineering, data science, and AI can be applied to solve real-world problems and create meaningful impact. Avid cricket player and follower.
